

ADVERTISEMENT FOR CONTRACTOR PREQUALIFICATION

R.L. SUTTON WRF BIOSOLIDS RECEIVING STATION

PROGRAM NO. T2018

for

THE BOARD OF COMMISSIONERS OF COBB COUNTY, GEORGIA

Statements of Qualifications from contractors interested in performing general construction associated with the R.L. Sutton WRF Biosolids Receiving Station project will be received by the **COBB COUNTY BOARD OF COMMISSIONERS**, herein referred to as "**Owner**", at the offices of the **Purchasing Department, 1772 County Services Parkway, Marietta, Georgia 30008**, until **12:00 Noon** (local time) on **Thursday, February 23, 2012**. The program name and program number must be shown on the outside of the envelope. **No applications will be accepted after the 12:00 Noon deadline.**

The names of the firms submitting prequalification applications will be announced at 2:00 PM (local time) on **Thursday, February 23, 2012**, in the **Purchasing Department Bid Room, Purchasing Department, 1772 County Services Parkway, Marietta, Georgia 30008**. Applications will be accepted only from Contractors who are listed on the Prequalification Package Holders List, signifying that they have obtained an application package from the Water System.

The Cobb County Water System intends to issue an advertisement for bids in the near future for the construction of a Biosolids Receiving Station at the R.L. Sutton Water Reclamation Facility in southeastern Cobb County, Georgia. The Biosolids Receiving Station will provide the means to introduce dewatered sewage biosolids, received via truck delivery from off-site sources, to the fluidized bed incineration system at the Sutton WRF. This project has an estimated construction cost of \$8 million and a contract time of 365 calendar days. It is currently anticipated that the project will be advertised for bids in the second quarter of calendar year 2012. The primary project components are briefly described below.

- Two 60 cubic yard sludge receiving bins with motorized, retractable covers and connections for odor control ducts.
- Conveyors to withdraw the received sludge from the bins into twin auger screw feeders to deliver the sludge to the transfer pumps.
- Two hydraulically-driven piston transfer pumps and hydraulic power units to send the sludge through high pressure steel piping to the Solids Process Building.
- An odor control system to ventilate the Biosolids Receiving Station and the treat odorous air.
- A below-grade, cast-in-place concrete equipment room to house the receiving bins, screw conveyors, and transfer pumps.
- A building superstructure that will completely enclose the equipment room and truck unloading area.

- In addition to the Biosolids Receiving Station, the project will include the construction of a pre-engineered steel frame canopy structure (approximately 95' L x 50' W x 20' H) to cover the Ash Drying Area adjacent to the Solids Process Building.

The prequalification application instructions and forms are available for pick-up at the offices of the Cobb County Water System, Engineering & Records Division, 660 South Cobb Drive, Marietta, Georgia 30060 or can be transmitted via postal delivery or email. Contact Tom Bailey at 770-419-6310 or thomas.bailey@cobbcounty.org for more information.

Any firm who wishes to bid on the R.L. Sutton WRF Biosolids Receiving Station project is required to complete and submit the Application for Prequalification documents. **Only Contractors who have been prequalified by the Owner through this process will be allowed to bid on this project.** Contractors submitting bids are required to have a valid State of Georgia Utility Contractors License.

This is not a solicitation for bid proposals. No guarantees, express or implied, are made that the Project will be constructed as described, or that the Project will be constructed at all. The Cobb County Water System reserves the right to revise, change, modify, or delete the Project or schedule. Prospective bidders responding to this notice do so at their own risk and option and therefore assume full responsibility for all costs associated with the preparation of the Application.
